## 2003 Boxxer Owner's Manual Addendum

**Boxxer Race Models:** The Boxxer Owner's Manual recommends removing the rebound adjuster knob to prevent loss during extreme riding conditions. However, due to the exposed nature of this adjuster, we strongly recommend that the user remove the adjuster prior to riding in any conditions.

**Boxxer World Cup and Team:** The rebound adjuster knob was removed from Boxxer World Cup and Team models. All World Cup and Team models now include a 2.5mm hex key. This hex key may be used on both rebound and compression damping adjustments. For on-the-trail-use, the hex key may be stored by carefully sliding it in between the upper tube and rubber fork stop.
